FICTIONAL PROCUREMENT RESPONSE | DEMO DATA

Clinical Operations and Healthcare Data Coordination Platform

Submitted by NexaWorks

Procurement need	A privacy-protective platform with validated workflows, healthcare interoperability, implementation, and dependable support.
Relevant experience	5 comparable deployments; two use the same subcontracted migration team
Five-year offer	$930,000 over five years

Executive summary

The lowest-cost offer has promising API depth but leaves ownership, security assurance, and transition details unresolved.

Supplier profile

High-growth provider with modern APIs, rapid releases, and the lowest price in this demonstration.

This is fictional demonstration material. Supplier names, customers, certifications, prices, performance figures, and proposal claims are invented.

Response to scoring criteria

The response sections use the same criterion names as the matching RFP Compass template. Statements below are the supplier's fictional claims for evaluation.

General criteria

Technical Capability

The platform supports REST APIs and a FHIR R4 Patient endpoint. The proposal does not include a BAA, HL7 interface conformance report, or evidence that clinical workflows were validated. Relevant experience: 5 comparable deployments; two use the same subcontracted migration team.

Implementation Plan

The 10-week estimate has no named validation owner. Workflow acceptance criteria and migration reconciliation are to be agreed after signature. Three subcontractors are proposed for interfaces, without named clinical validation roles.

Commercial Value

Five-year total is $1.12 million. BAA negotiation, validation support, premium support, and additional interfaces are excluded or separately priced.

Security & Compliance

The vendor states encryption at rest and in transit but supplies no current SOC 2 report, ISO certificate, or BAA. Hosting region and subprocessor locations are not disclosed. The security audit is planned for the fourth quarter.

Support & Experience

Priority 1 support is available 24 by 5 with a one-hour response target. Recovery time, recovery point, clinical downtime procedure, and continuity exercise evidence are not supplied. Relevant experience: 5 comparable deployments; two use the same subcontracted migration team.

Response to scoring criteria · continued

Domain-specific criteria

HIPAA & GxP Controls

The vendor states encryption at rest and in transit but supplies no current SOC 2 report, ISO certificate, or BAA. Hosting region and subprocessor locations are not disclosed. The security audit is planned for the fourth quarter.

Clinical Validation

The 10-week estimate has no named validation owner. Workflow acceptance criteria and migration reconciliation are to be agreed after signature. Three subcontractors are proposed for interfaces, without named clinical validation roles.

HL7/FHIR Interoperability

The platform supports REST APIs and a FHIR R4 Patient endpoint. The proposal does not include a BAA, HL7 interface conformance report, or evidence that clinical workflows were validated.

Patient Data Governance

The vendor states encryption at rest and in transit but supplies no current SOC 2 report, ISO certificate, or BAA. Hosting region and subprocessor locations are not disclosed. The security audit is planned for the fourth quarter.

Safety & Quality Management

The 10-week estimate has no named validation owner. Workflow acceptance criteria and migration reconciliation are to be agreed after signature. Three subcontractors are proposed for interfaces, without named clinical validation roles.

Key exception / clarification

The offer has no BAA and no current independent security report. Validation, continuity, and subcontractor ownership require substantial clarification.

All response claims are fictional and included only for software demonstration. Do not use them as real procurement evidence.
