FICTIONAL PROCUREMENT RESPONSE | DEMO DATA

Clinical Operations and Healthcare Data Coordination Platform

Submitted by Orbit Digital

Procurement need	A privacy-protective platform with validated workflows, healthcare interoperability, implementation, and dependable support.
Relevant experience	10 comparable deployments, including four public-sector organizations
Five-year offer	$1.19 million over five years

Executive summary

A balanced offer with strong local support and credible assurance. The smaller specialist bench and fewer advanced analytics are the main tradeoffs.

Supplier profile

Established regional provider focused on dependable operations, practical delivery, and local support.

This is fictional demonstration material. Supplier names, customers, certifications, prices, performance figures, and proposal claims are invented.

Response to scoring criteria

The response sections use the same criterion names as the matching RFP Compass template. Statements below are the supplier's fictional claims for evaluation.

General criteria

Technical Capability

The platform supports HL7 v2 ADT and FHIR R4 Patient and Encounter resources. The proposal includes an interface inventory and test scripts, but not FHIR Observation support in the base package. Relevant experience: 10 comparable deployments, including four public-sector organizations.

Implementation Plan

A local clinical delivery director leads a 15-week deployment. The plan includes workflow mapping, migration reconciliation, one validation rehearsal, clinical user training, and a two-week go-live support window.

Commercial Value

Five-year total is $1.36 million, including the BAA, standard interfaces, validation rehearsal, and critical incident support. FHIR Observation and advanced analytics are priced separately.

Security & Compliance

A current ISO 27001 certificate is valid through May 31, 2027. A standard BAA is offered. AES-256 at rest, TLS 1.2 in transit, role-based access, and quarterly access reviews are documented.

Support & Experience

Priority 1 incidents receive a 20-minute response at all hours. Recovery time is eight hours and recovery point is two hours. Monthly service reporting and quarterly continuity tests are included. Relevant experience: 10 comparable deployments, including four public-sector organizations.

Domain-specific criteria

HIPAA & GxP Controls

A current ISO 27001 certificate is valid through May 31, 2027. A standard BAA is offered. AES-256 at rest, TLS 1.2 in transit, role-based access, and quarterly access reviews are documented.

Clinical Validation

A local clinical delivery director leads a 15-week deployment. The plan includes workflow mapping, migration reconciliation, one validation rehearsal, clinical user training, and a two-week go-live support window.

HL7/FHIR Interoperability

The platform supports HL7 v2 ADT and FHIR R4 Patient and Encounter resources. The proposal includes an interface inventory and test scripts, but not FHIR Observation support in the base package.

Patient Data Governance

A current ISO 27001 certificate is valid through May 31, 2027. A standard BAA is offered. AES-256 at rest, TLS 1.2 in transit, role-based access, and quarterly access reviews are documented.

Safety & Quality Management

A local clinical delivery director leads a 15-week deployment. The plan includes workflow mapping, migration reconciliation, one validation rehearsal, clinical user training, and a two-week go-live support window.

Key exception / clarification

The offer has practical local support and a BAA, but has fewer specialist clinical resources and a narrower FHIR package than the enterprise leader.

All response claims are fictional and included only for software demonstration. Do not use them as real procurement evidence.
