FICTIONAL PROCUREMENT RESPONSE | DEMO DATA

Enterprise SaaS Platform and Implementation Services

Submitted by Apex Systems

Procurement need	A secure cloud platform with implementation, migration, training, integrations, and five years of support.
Relevant experience	12 comparable enterprise deployments in the past five years
Five-year offer	$1.42 million over five years

Executive summary

A complete, well-evidenced offer with strong assurance, operations, and exit commitments. The main tradeoff is a higher five-year price.

Supplier profile

Large enterprise platform vendor with a mature implementation practice and premium pricing.

This is fictional demonstration material. Supplier names, customers, certifications, prices, performance figures, and proposal claims are invented.

Response to scoring criteria

The response sections use the same criterion names as the matching RFP Compass template. Statements below are the supplier's fictional claims for evaluation.

General criteria

Technical Capability

The platform supports 2 million named users.

Implementation Plan

A named program director and migration lead own a 16-week rollout. The plan includes source data mapping, two migration rehearsals, role-based user testing, a rollback checkpoint, and administrator training before go-live.

Commercial Value

Five-year total is $1.42 million, including implementation, subscription, standard support, and two migration rehearsals. Optional premium analytics are excluded and priced separately.

Security & Compliance

Data is encrypted with AES-256 at rest and TLS 1.2 or later in transit. The incident plan commits to customer notice within 24 hours of a confirmed material incident.

Support & Experience

Priority 1 support is staffed 24 by 7 with a 15-minute response target. Relevant experience: 12 comparable enterprise deployments in the past five years.

Response to scoring criteria · continued

Domain-specific criteria

Service Levels & Availability

The service target is 99.95% monthly uptime. The continuity plan states a four-hour recovery time objective and a one-hour recovery point objective. Service credits apply when monthly uptime falls below the contracted target.

API & Integration Depth

REST APIs, SCIM provisioning, and tested connectors for Okta and Workday.

Data Residency & Privacy

The production design uses separate US and EU regions.

Exit & Portability

At contract end, the customer may export records and relationships in CSV and JSON without an extraction fee. The offer includes 90 days of transition assistance and a deletion certificate after the retention period.

Security Certification

The response includes a current SOC 2 Type II report dated February 15, 2026, and an ISO 27001 certificate valid through June 30, 2027.

Key exception / clarification

The proposal does not identify the number of EU-based support engineers. Confirm regional support coverage during negotiation.

All response claims are fictional and included only for software demonstration. Do not use them as real procurement evidence.
