FICTIONAL PROCUREMENT RESPONSE | DEMO DATA

Enterprise SaaS Platform and Implementation Services

Submitted by BrightPath Tech

Procurement need	A secure cloud platform with implementation, migration, training, integrations, and five years of support.
Relevant experience	8 comparable deployments, including three migrations from legacy platforms
Five-year offer	$1.08 million over five years

Executive summary

The clearest implementation plan and a competitive price. Independent security assurance is incomplete, so the buyer should treat the certification gap as a material risk.

Supplier profile

Mid-sized specialist with a collaborative delivery model and competitive pricing.

This is fictional demonstration material. Supplier names, customers, certifications, prices, performance figures, and proposal claims are invented.

Response to scoring criteria

The response sections use the same criterion names as the matching RFP Compass template. Statements below are the supplier's fictional claims for evaluation.

General criteria

Technical Capability

The service supports 600,000 users.

Implementation Plan

A named project manager and data migration lead own a 12-week rollout. The schedule includes weekly decision meetings, three data rehearsals, acceptance criteria for each milestone, and two weeks of post-launch support.

Commercial Value

Five-year total is $1.08 million, including implementation and standard support. Workday integration, data archive storage, and after-hours change requests are excluded.

Security & Compliance

AES-256 at rest and TLS 1.2 in transit are described. The production hosting region and subprocessor locations are not identified in this proposal. The security lead will provide a remediation tracker each month.

Support & Experience

Priority 1 incidents receive a 30-minute response during 24 by 7 coverage. Relevant experience: 8 comparable deployments, including three migrations from legacy platforms.

Response to scoring criteria · continued

Domain-specific criteria

Service Levels & Availability

The recovery time objective is 12 hours and recovery point objective is four hours. Service credits are offered below 99.9% uptime.

API & Integration Depth

REST APIs, SAML single sign-on, and standard CSV import. The proposal lists connectors for Okta and Microsoft Entra ID but leaves the Workday connector as a later change request.

Data Residency & Privacy

The production hosting region and subprocessor locations are not identified in this proposal.

Exit & Portability

A CSV export is available at termination. The proposal does not describe exporting user permissions or linked records, and transition support is limited to 30 days.

Security Certification

The SOC 2 Type II assessment is in progress; the proposal confirms there is no current SOC 2 report, and no ISO 27001 certificate is supplied.

Key exception / clarification

No current independent security report is provided. Workday integration and full data portability need contractual clarification.

All response claims are fictional and included only for software demonstration. Do not use them as real procurement evidence.
