FICTIONAL PROCUREMENT RESPONSE | DEMO DATA

Enterprise SaaS Platform and Implementation Services

Submitted by NexaWorks

Procurement need	A secure cloud platform with implementation, migration, training, integrations, and five years of support.
Relevant experience	5 comparable deployments; two use the same subcontracted migration team
Five-year offer	$930,000 over five years

Executive summary

The lowest-cost offer has promising API depth but leaves ownership, security assurance, and transition details unresolved.

Supplier profile

High-growth provider with modern APIs, rapid releases, and the lowest price in this demonstration.

This is fictional demonstration material. Supplier names, customers, certifications, prices, performance figures, and proposal claims are invented.

Response to scoring criteria

The response sections use the same criterion names as the matching RFP Compass template. Statements below are the supplier's fictional claims for evaluation.

General criteria

Technical Capability

The proposal does not specify a tested user limit or a committed production availability target.

Implementation Plan

The estimated rollout is 10 weeks, but the plan does not name a customer-side migration owner. Data mapping and acceptance criteria are described as to be agreed after contract signature. The proposal uses three subcontractors for integration work.

Commercial Value

Five-year total is $930,000, the lowest offer. The price excludes premium support, data egress, subcontractor changes, and any additional migration rehearsals.

Security & Compliance

AES-256 at rest and TLS 1.2 in transit are stated. Hosting region and subprocessor locations are not listed.

Support & Experience

Priority 1 support is available 24 by 5 with a one-hour response target. Relevant experience: 5 comparable deployments; two use the same subcontracted migration team.

Response to scoring criteria · continued

Domain-specific criteria

Service Levels & Availability

The service target is 99.7% monthly uptime. Recovery objectives and service credits are not stated.

API & Integration Depth

The product offers REST and GraphQL APIs, webhooks, and a monthly release cadence. Three critical connectors are delivered by subcontractors.

Data Residency & Privacy

Hosting region and subprocessor locations are not listed.

Exit & Portability

The vendor offers a basic CSV extract. Exporting linked records, configuration, and audit history is not described; transition assistance is not included in the fixed price.

Security Certification

The company has no current SOC 2 Type II report or ISO 27001 certificate; the SOC 2 audit is planned for the fourth quarter.

Key exception / clarification

No current security certificate, unspecified hosting region, missing recovery targets, and an incomplete exit plan create significant delivery risk.

All response claims are fictional and included only for software demonstration. Do not use them as real procurement evidence.
