FICTIONAL PROCUREMENT RESPONSE | DEMO DATA

Enterprise SaaS Platform and Implementation Services

Submitted by Orbit Digital

Procurement need	A secure cloud platform with implementation, migration, training, integrations, and five years of support.
Relevant experience	10 comparable deployments, including four public-sector organizations
Five-year offer	$1.19 million over five years

Executive summary

A balanced offer with strong local support and credible assurance. The smaller specialist bench and fewer advanced analytics are the main tradeoffs.

Supplier profile

Established regional provider focused on dependable operations, practical delivery, and local support.

This is fictional demonstration material. Supplier names, customers, certifications, prices, performance figures, and proposal claims are invented.

Response to scoring criteria

The response sections use the same criterion names as the matching RFP Compass template. Statements below are the supplier's fictional claims for evaluation.

General criteria

Technical Capability

The platform supports 400,000 users.

Implementation Plan

A local delivery director owns a 15-week rollout. The plan includes process workshops, a staged migration, one full rehearsal, weekly risk review, and administrator training. Advanced analytics are limited to the standard reporting package.

Commercial Value

Five-year total is $1.19 million, including the standard reporting package, implementation, and 24 by 7 critical support. Custom analytics and non-standard integrations are excluded.

Security & Compliance

AES-256 at rest, TLS 1.2 in transit, quarterly access reviews, and a 24-hour incident notification target are documented.

Support & Experience

Priority 1 support receives a 20-minute response at all hours. Relevant experience: 10 comparable deployments, including four public-sector organizations.

Response to scoring criteria · continued

Domain-specific criteria

Service Levels & Availability

Recovery time is eight hours and recovery point is two hours.

API & Integration Depth

REST APIs, SAML, and standard connectors for Microsoft Entra ID and ServiceNow.

Data Residency & Privacy

Hosting is available in the US and EU.

Exit & Portability

Data is exportable in CSV and JSON with linked records. A 60-day transition package is included; custom report definitions require a separate statement of work.

Security Certification

A current ISO 27001 certificate is valid through May 31, 2027.

Key exception / clarification

The regional team is accessible, but the proposal has fewer specialist analytics resources and a less generous recovery target than the enterprise leader.

All response claims are fictional and included only for software demonstration. Do not use them as real procurement evidence.
